

Documentation

There are four variables that you can control, they are sex, status, verbal and gamble. As shown in app, you can choose male or female in sex selection. You can choose the income number and status score by using the numeric input. You can choose use sliderinput to choose a score from 1 to 12. After you chose all four, then you submit it. You can get a number which is calculated based on the prediction model. It is a prediction of the expenditure on gambling in pounds per year based on the four indexes above.
